EXAMINATION GLOVES+

SEMPERCARE® LATEX GLOVES

Sempercure® examination gloves from Sempermed are developed to meet your high demands and various applications. Safety and comfort are top priority.

Sempercure® Latex - The lining of the Sempercure® Edition is not applied loosely, but bonded directly into the latex material using a specially developed process: "fusion bonded". This guarantees that it is easy and fast to don.

An ideal partner for daily use.

Suitable for:

- + Hospitals
- + Health centres
- + Dentists
- + Nursing

SEMPERCARE® NITRILE SKIN² GLOVES

In addition to protection, wearing comfort and skin-friendliness, a good sense of touch is the most important criterion when choosing the right examination glove. The new Sempercure® Nitrile skin² combines these properties in a unique, exceptionally light glove.

The soft material developed by our European Research Centre allows for maximum sense of touch and comfort due to optimised wall thickness, and at the same time maximum protection from infections. Discover your 2nd skin!

Key Features

- + Protection from infections
- + Excellent sense of touch
- + High wearing comfort
