1 trainer for every 6 students and a maximum of 6 per each course registered with PHECC.

All course materials including certificates, registration fees, manuals and pocket face masks are included in the cost of the course.

CARDIAC FIRST RESPONSE (CFR) COMMUNITY LEVEL

FIRST AID TRAINING

Aim: To train Cardiac first responders at Community level who may be dispatched or come across the following emergencies: cardiac arrest, heart attack, choking and stroke. The care management includes, FAST assessment, cardiopulmonary resuscitation (CPR) for adults, children and infants, AED use and Aspirin administration.

A cardiac first responder plays a critical role in keeping a person alive until the commencement of expert medical care.

Learning: Recognise the signs of a life threatening emergency. Respond in an effective, safe and appropriate manner, to a life threatening emergency, utilising basic life support skills. Retrieve and appropriately use, if required, an automated external defibrillator during a cardiac arrest. Report and Record their actions and interventions appropriately and handover to emergency medical services.

Course Duration: 1-day course for 5 hours done onsite

Participants: Maximum of 6 people per course registered. Minimum of 6 participants.

Certification: All successful candidates will receive a Pre-Hospital Emergency Care Council (PHECC) certificate valid for a period of 2 years

Price: 80-100 euro per person
